

# COUNTRYSIDE e-LEARNING: FOURTH GRADE

## MEASURE IT!

Get ONE CUP of snow and bring it inside. Predict: How long will it take to melt? How long did it actually take? What factors could contribute to faster melting?

## BUBBLES!

You can make your very own soap solution. Start with very warm/hot water (an adult may need to help you). You can also use your own store bought bubble solution at home. Blow a bubble outside. If you can, catch it on your wand. Watch what happens to your bubble!

## Write a letter or postcard

Create a postcard and decorate one side. Address the letter to a friend or family member who lives far away. And/or, you can write a letter to a friend about your snow day!

## Invent a Game!

Find dice or cards. Create a game that uses multiplication and/or division. Be prepared to show the rules with the class. Tip: a pizza box can make a great board game plus storage!

## Weather Tracker

Track the temperature (either online or with a thermometer). Great a line graph to show temperature change over time! Bonus: find the mean, median, mode, and range of your data!

## Snowman Writing

Write a story about what happens to your snowman when kids are not around. What does your snowman/woman do? What happens while kids are asleep? Be sure to check your spelling and grammar when done. You can publish your story with illustrations. .

## Reader Selfie!

Complete your daily reading, but with a twist. This time take a selfie in your favorite reading spot.

Bonus:

Email the author of your book and ask some questions about the book. Share back with your class! Many authors will write you back!

## Spread Kindness

Do a random act of kindness. Who could use some love in your life. Can you create a card for them? Bake cookies and deliver them to their doorstep? Facetime with a grandparent? Create artwork to give to a special adult in your life to show them how much they mean to you?
