

Snow Removal Plan of District-owned Artificial Turf and Track

As we look ahead to the spring athletic season here at Edina High School, we share with you the following plan for removal of snow from the district's artificial turf fields and track. The plan is intended to ensure appropriate care and maintenance of the fields while also providing for unexpected late winter weather.

1. The district will allow for the natural melting of snow and ice through March 31.
2. The district will assist with the natural removal of snow/ice via mechanical means so that fields are clear by April 15.
3. In the event of a snow day after April 1, and the melting of winter snow had the artificial turf clear, the district will prioritize snow removal as follows:
 - a. First priority for snow removal will be schools, parking lots, facility entrances and other primary student/staff/community areas
 - b. After primary areas are cleared, the district will move on to outdoor athletic facilities and the clearing of artificial turf.
4. Athletic teams are not to coordinate snow removal from any fields or track without the prior approval of the Activities Director and the Director of Buildings and Grounds.
5. The district reserves the right to modify or adjust the above snow removal plan based on the weather event.

We look forward to working in partnership with all of our teams to encourage a healthy and exciting spring athletic season.
